TECHNICAL SKILLS

Core

TypeScript, JavaScript, Node.js, NestJS, Express.js, PostgreSQL, React, Next.js

Databases

PostgreSQL, MySQL, MongoDB, SQLite

APIs & Backend

REST, GraphQL, Swagger/OpenAPI, Postman

Cloud & DevOps

Docker, Google Cloud, AWS, Git, GitHub, CI/CD

Testing & Security

Jest, Supertest, OAuth2, JWT, API Authentication & Authorization

Additional

Firebase, Vite, Vue, Tailwind CSS, Solidity, Solana/Web3

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of professional experience building and maintaining production web applications and backend services using TypeScript, Node.js, NestJS and PostgreSQL, with full-stack experience across React and Next.js. Experienced in designing REST and GraphQL APIs, authentication and authorization, payment and KYC integrations, database optimization, automated testing, CI/CD and cloud deployment. Comfortable working across the development lifecycle, from requirements and technical design through implementation, testing, deployment and production debugging.

WORK HISTORY

Software Engineer, GoWithMe Limited

Aug 2025 – Present | Lagos, Nigeria

- Develop and maintain backend services for a production carpooling platform using NestJS and PostgreSQL, supporting user, trip, payment and administrative workflows.
- Integrate Paystack wallet payments and MetaMap KYC verification for driver onboarding, handling third-party API communication, validation, error handling and failure scenarios.
- Design and implement permission-based Admin Dashboard APIs for super-admin and support-admin roles, enforcing server-side authorization across user, trip and payment operations.
- Implement multi-channel notification workflows using Firebase, Termii and Nodemailer for push notifications, SMS and email delivery.
- Collaborate with frontend, product and QA teams in Agile sprints to deliver features, resolve integration issues and perform end-to-end testing.
- Contribute to deployment readiness, technical documentation and cloud infrastructure across Google Cloud and Render environments.

Software Engineer (Full-Stack),

Estatify Nigeria Limited

Jul 2024 – Aug 2025 | Lagos, Nigeria

- Built and maintained full-stack web applications using React, Next.js, Node.js and NestJS, integrating responsive frontend interfaces with backend services and APIs.
- Designed and implemented RESTful and GraphQL APIs to support communication between frontend applications and backend business logic.
- Improved application performance through server-side rendering, database query optimization, code splitting and caching strategies, reducing unnecessary processing and improving page-load experience.
- Participated in technical planning, code reviews, Agile delivery and end-to-end feature development across frontend and backend systems.

- Worked with CI/CD and modern development workflows to support reliable testing, integration and deployment.

Software Engineer, Decagon

Oct 2023 – Jun 2024 | Lagos, Nigeria

- Built and delivered 5+ full-stack applications using JavaScript, TypeScript, Node.js, Express and React, applying production-oriented development practices across frontend and backend layers.
- Designed and worked with relational and non-relational data models using PostgreSQL, MySQL and MongoDB.
- Developed unit and integration tests to validate application behavior, improve reliability and reduce regressions.
- Participated in code reviews, debugging sessions and collaborative development workflows, applying feedback to improve code quality and maintainability.

Associate Software Engineer, Trax Investment Limited

Sep 2022 – Oct 2023 | Lagos, Nigeria

- Supported the development and maintenance of scalable software solutions, contributing to feature implementation, debugging and code quality improvements.
- Maintained technical documentation and participated in code reviews to improve consistency, maintainability and knowledge sharing across the team.
- Collaborated with senior developers through daily stand-ups, technical discussions and team planning to deliver features against project requirements.
- Proactively expanded technical capabilities through structured courses, workshops and hands-on development.

Software Developer, Snapnet Limited

Apr 2021 – Sep 2022 | Lagos, Nigeria

- Developed and supported enterprise security systems, contributing to the implementation of cybersecurity controls and secure development practices.
- Applied cybersecurity standards and best practices to improve system security and reduce exposure to common threats.
- Collaborated with legal and compliance teams on security reviews, audits and risk-related requirements.
- Monitored systems and investigated security events to help identify and mitigate potential data-breach and intrusion risks.

PROJECTS

CleanScape - Commercial Cleaning Platform

TypeScript, Next.js, Supabase, Stripe

Full-stack platform connecting customers with cleaning professionals, with application workflows spanning authentication, service management and payment processing.

InsureTech API – Insurance & Wallet Management System

NestJS, TypeScript, PostgreSQL, Sequelize, Swagger/OpenAPI, Jest

Backend API for insurance and wallet-management workflows, with structured REST endpoints, database persistence, API documentation and automated testing.

QUEST - Modern Feedback Collection Platform

Next.js, TypeScript, Stripe, Drizzle, Database Functions

Modern feedback collection platform with subscription/payment functionality and a Next.js-based application architecture.

VaultCraft - Solana SPL Token Management Platform

React, TypeScript, Tailwind CSS, Solana Web3.js, SPL Token Library, Phantom Wallet Adapter, Vercel

Web3 application for interacting with Solana SPL token workflows through a React-based interface.

EDUCATION

Barrister-at-Law (B.L), Nigerian Law School

Nov 2018 – Aug 2019

Bachelor of Laws (LL.B), Delta State University

Mar 2013 – May 2018

CERTIFICATIONS

- AWS Cloud Practitioner Essentials
- Google Cloud Computing Foundations
- Introducing Generative AI with AWS
- Scrum Fundamentals Certified
- Cisco Introduction to Cybersecurity
